2026 EDITION · REVISED NOVEMBER 2026

FOR FEDEX GROUND CONTRACTED SERVICE PROVIDERS

The Driver Handbook

Expectations, standards and federal rules for every driver on our FedEx Ground routes — at every terminal we serve.

APPLIES TO
Every driver, route & terminal

TERMINAL
_____

DISPATCH
_____

CONTRACTED SERVICE PROVIDER FOR FEDEX GROUND

WELCOME TO THE TEAM

Why this handbook exists

Every morning we load more than boxes — we carry the reputation of our company and the trust of every neighborhood we serve. This handbook puts everything you need in one place: how we run our day, the FedEx Ground standards we contract to meet, and the federal rules that keep you and the public safe.

Read it once from start to finish. Keep it in your cab. When you are unsure, look it up — and when it is not in here, call us.

> *Anyone can drive a truck, but it takes a true professional to own a route. Preparation at the dock, discipline on the road and pride at every doorstep — when each driver masters the craft, the whole company wins.*
>
> **FOR OUR DRIVERS · THE FRONTLINE STANDARD**

> *Top-tier service is built on rapport and respect. Leadership's job is to set clear expectations, give every driver the tools to succeed, listen closely and back the team with fast, fair support on the road.*
>
> **FOR OUR MANAGEMENT · THE LEADERSHIP STANDARD**

WHEN RULES OVERLAP

Federal and state law, FedEx Ground contracting standards and company policy all apply to you. When they differ, **follow the strictest one.**

— *Management, your company*

PART I

Who we are

Our purpose, the companies whose rules we follow, and what it takes to wear the uniform.

01

CHAPTER 01

Mission, vision & values

Why we exist today — and where we are headed together.

Our mission

To deliver every FedEx Ground shipment in the communities we serve **safely, accurately and on time on the first attempt** — while building a "Driver-First" workplace founded on thorough dock preparation, disciplined defensive driving, mutual respect and fast support on the road.

Our vision

To be the safest, most reliable contracted service provider at every terminal we operate — with **zero preventable accidents**, **zero uncoded packages** and professional standards that let every driver, and the company, grow together.

Justice, honor & self-discipline

- Fair scheduling and honest exception coding.
- Own your route, your truck and your results.

Driver-first support

- A spare truck at the station for breakdowns.
- Rescue help on heavy days and rotating weekend coverage.

Zero weapons · zero substances

- No firearms or weapons, alcohol or illegal drugs on station property or in any truck.
- Details in Chapter 13.

02

CHAPTER 02

Working on FedEx Ground routes

You work for a contractor. Your contractor works for FedEx Ground. That means three rulebooks apply to you.

FedEx Ground does not employ its pickup-and-delivery drivers directly. It contracts routes to independent businesses — **contracted service providers** like your company — who employ the drivers, own or lease the trucks and are responsible for safety compliance. You are your contractor's employee, but you represent FedEx at every door.

1. **1 · The law**
   Federal Motor Carrier Safety Regulations (49 CFR Parts 382–396), hazmat rules (Parts 171–177), OSHA, and your state and city traffic laws.

2. **2 · FedEx Ground contracting standards**
   Uniform and appearance, vehicle look and condition, safety technology (cameras), service standards and scanning procedures. FedEx can refuse a driver who does not meet them.

3. **3 · Company policy**
   This handbook: our 7-step day, call-first rules, truck care and conduct.

Safety technology in your truck

- FedEx Ground requires contractors to run an approved **video event data recorder (VEDR)** — a road- and driver-facing camera that flags risky events like following too close, rolling stops, phone use and no seat belt.
- Many trucks also have collision and lane-departure warnings, blind-spot and backing cameras. Treat alerts as real.
- **Blocking, unplugging or tampering with any camera or sensor is grounds for immediate termination.**

We are scored every day

- FedEx measures each contractor on safety and service: on-time pickups, delivery completion, exceptions, damages, and camera events.
- Those numbers decide whether your company keeps and grows its routes — and your job.
- Every missed delivery, every uncoded package and every camera event shows up on our scorecard.

03

CHAPTER 03

Qualifications, records & testing

What you need to drive — and keep — a route.

To drive these routes you must

- Be **at least 21** to drive a commercial vehicle across state lines. 49 CFR 391.11
- Hold a valid driver's license for the vehicle you drive — and keep it valid.
- Pass a **DOT physical** and carry a current medical examiner's certificate. It lasts **up to 24 months**, or less if the examiner says so. 49 CFR 391.41–391.45
- Read and speak English well enough to understand road signs and talk with officers. 49 CFR 391.11
- Pass a background check, a driving-record (MVR) review and a pre-employment drug screen.

Tell management immediately if

- Your license is suspended, revoked or expires.
- You get any traffic ticket or are convicted of a moving violation — in any vehicle.
- Your medical card is about to expire, or a health change affects your driving or a medication makes you drowsy.
- You are involved in any crash or damage, however small.

YOUR DRIVER FILE

Your company keeps a federal driver qualification file on you (application, MVRs, medical card, road test). Your driving record is reviewed every year. Keep your copy of the medical card in your wallet — an inspector can ask for it.

04

CHAPTER 04

Uniform & professional appearance

Customers open the door to a FedEx professional. FedEx Ground's contracting standards require it — and so do we.

The uniform

- **FedEx uniform shirt** with the FedEx logo, tucked and clean.
- **Uniform pants or shorts**, with **dark shoes and dark socks**.
- Jackets, caps and cold-weather layers must be **FedEx-approved uniform items**. No hoodies or other brands over the uniform.
- Keep every piece in good condition — **no rips, tears or noticeable stains.** Ask for a replacement before it gets there.

ID & grooming

- **FedEx ID badge visible at all times** on route and at the terminal.
- Your appearance should match your badge photo.
- Clean, neat and well groomed — hair and facial hair trimmed, no body odor.
- Tattoos or piercings management finds offensive must be covered or removed on duty.

Safety gear (company standard)

- Closed-toe, slip-resistant work shoes or boots. No sandals, slides or bare canvas shoes.
- High-visibility vest on the terminal yard and dock.
- Gloves for heavy, sharp or wet freight.
- No earbuds in both ears. Calls only hands-free, where your state allows it.

WHY IT MATTERS

FedEx can refuse dispatch to a driver who does not meet its appearance standard. Out of uniform means off the route.

PART II

The 7-step day

From the first walk-around to the last key in the lockbox — how a professional runs a route.

05

CHAPTER 05 · STEP 1 OF 7

Pre-trip inspection & readiness

Winning the day starts before you turn the key. Federal law says you may not drive until you are satisfied the truck is safe. 49 CFR 392.7 · 396.13

Walk-around

- **Last report:** read the previous driver's inspection report. If it listed defects, sign that the repairs were made.
- **Tires:** inflation, cuts, bulges, tight lug nuts. Minimum tread **4/32" on front steer tires, 2/32" on all others.** 393.75
- **Brakes:** firm pedal and a parking brake that holds.
- **Steering:** no excess free play. On a 20" wheel the limit is **2½" (manual) or 5¼" (power steering)**. 393.209
- **Lights & glass:** headlights, brake lights, turn signals, flashers, mirrors, wipers, horn and backup camera.
- **Fluids & leaks:** oil and coolant levels, and no puddles under the truck.
- **Fuel:** leave the station with a full tank.

Emergency equipment 393.95

- **Fire extinguisher** rated **5 B:C** (or two rated 4 B:C), charged, secured and within reach.
- **Three reflective warning triangles** (or at least six fuses/flares).
- First-aid kit, registration, insurance card and annual inspection proof.
- *2026 update:* spare fuses are no longer a federal requirement and liquid-burning flares are no longer accepted warning devices. Use triangles.

Scanner, GroundCloud & route

- Scanner and spare battery fully charged and syncing.
- Log in to **GroundCloud** with **location tracking ON** before you leave the terminal.
- Review your manifest for stops or pickups outside your area, and tell dispatch before you roll out.
- Report warning lights, tire problems or new damage **at the dock** — never drive a truck you think is unsafe.

06

CHAPTER 06 · STEP 2 OF 7

Dock organization & preventing missed deliveries

Fifteen minutes on your shelves in the morning saves an hour of searching on the road.

Why it matters

- Sort and lip-load every package by **stop ID (SID)** and sequence, label facing the aisle, before dispatch.
- A **missed delivery (Code 01)** usually means a package was buried or on the wrong shelf, missed at the stop and found too late.
- Heavy freight goes low. Keep the center aisle clear — it is your walkway.

Catch problems at the dock

- **Misloads:** packages for another route or ZIP code go back to the terminal before you leave.
- **Bad addresses:** missing street, suite or apartment numbers get flagged so management can research them early.
- **Damage:** crushed, wet, leaking or open boxes go to QA before loading.
- **Heavy packages:** boxes over 70 lb usually carry a heavy-package label. FedEx Ground takes packages up to 150 lb — plan a hand truck or team lift.

STEP-VAN SHELF MAP · SID ZONES 1000–8500

1000 · Driver side, top front First stops of the day, priority business	▲ CAB	**2000 · Curb side, top front** Morning sequence, easy exit
3000 · Driver side, middle front Mid-morning stops, labels facing aisle	KEEP AISLE CLEAR	**4000 · Curb side, middle front** Mid-day sequence, smalls bagged
5000 · Driver side, low front Heavy cartons stay low		**6000 · Curb side, low front** Afternoon heavy / medium
7000 · Driver side, rear Afternoon sequence, mid-size freight	REAR DOOR ▼	**8000 / 8500 · Curb rear & floor** Bulk stops, team lifts, braced hazmat

07

CHAPTER 07 · STEP 3 OF 7

Safe driving — accuracy over speed

Time is saved at the dock, never by speeding on the street.

100%	0	6+ s	3
SEAT BELT USE	HANDHELD PHONE USE	FOLLOWING DISTANCE	POINTS OF CONTACT

Road rules

- Obey every posted speed limit, including school zones and neighborhoods.
- **Seat belt on** before the truck moves — even 50 feet between houses. 392.16
- Full stops at every stop sign. Rolling stops are camera events.
- Keep at least 6 seconds behind the vehicle ahead, and more in rain or at night.

Backing & parking

- Park so you can pull forward. Avoid backing whenever possible.
- If you must back up: **G.O.A.L. — Get Out And Look**, flashers on, two horn taps, then back slowly using mirrors and camera.
- At every stop: parking brake set, engine off, keys out, doors locked when out of sight.

Your body

- **Three points of contact** getting in and out of the cab and cargo area. **Never jump out.**
- Lift with your legs, keep the load close and do not twist under weight.
- Use the hand truck for heavy or bulky packages, and get help with anything you cannot handle safely.

08

CHAPTER 08 · STEP 4 OF 7

Delivery execution & signatures

Right package, right door, right proof — every stop.

At the door

- **Read the label twice:** once in the truck and again at the door. Check name, street number, street and apt/suite.
- **Upper-floor apartments:** carry the package to the actual apartment door. Never leave it at the stairwell or breezeway.
- Place it out of street view and out of the weather: porch, garage, side door or locker.
- **Sharp proof-of-delivery photo:** the package in its spot, with enough of the doorway to show where. No people, no faces, no blurry shots or photos taken from the cab.
- If you choose "Other" on the scanner, type exactly where you left it.

Gates, dogs & doubts

- Locked gate or loose dog blocking the door? Find a safe, sheltered alternative spot — or call before you code.
- Rattle the gate, honk or whistle before you enter any yard. See Chapter 15 for dog safety.
- **Not sure a spot is safe? Call dispatch from the stop before you walk away.**

SIGNATURE OPTION	WHO MAY SIGN	CAN YOU RELEASE WITHOUT A PERSON?	COMPANY RULE
No signature	No one	**Yes.** Leave it safely at the address.	Sheltered spot plus a clear POD photo.

SIGNATURE OPTION	WHO MAY SIGN	CAN YOU RELEASE WITHOUT A PERSON?	COMPANY RULE
ISR · Indirect	Recipient, a neighbor, a building manager or another nearby person, or the recipient's signed door tag / electronic release	**Only** with a signed door tag or recorded release	No one home? Leave a door tag, scan it and code the stop.
DSR · Direct	**Someone at the delivery address**	**No.** Neighbors and door tags do not count.	Get a live signature at that address. Never sign for a customer.
ASR · Adult 21+	Someone **21 or older at the address** with a valid government-issued photo ID	**No.** Zero exceptions.	Check the ID and the date of birth every time.

Signature options as defined by FedEx (fedex.com, delivery signature options).

09

CHAPTER 09 · STEP 5 OF 7

Pickups & 100% scanning

Pickups weigh heavily on our FedEx scorecard. They run on the clock.

Never early, never late

- Review every scheduled pickup on your scanner and GroundCloud before you leave the station.
- Arrive and scan **inside the customer's pickup window.** A scan before it opens or after it closes counts as a service failure.
- Running late for a window? Call dispatch **before** you miss it, not after.

Scan everything

- Scan **each package** as you load it. Never toss unscanned boxes in the back to scan later.
- Nothing ready at a scheduled pickup? Still arrive inside the window, talk to the shipper and close the stop with the correct code.
- Inspect hazmat pickups for proper paperwork and labels before you accept them (Chapter 14).

10

CHAPTER 10 · STEP 6 OF 7

Scanner & delivery exception codes

An honest, accurate code tells the customer the truth — and protects you.

BAD ADDRESS (03) — CALL FIRST

Only for an address that is truly wrong or incomplete — **never** because you couldn't find the house. Call dispatch from the stop before you use it.

MISSED DELIVERY (01) — PREVENT IT

A missed package is almost always a dock problem. Sort by SID every morning, and call if an emergency blocks a stop.

ZERO UNCODED PACKAGES

Never bring a package back without a code. Walk the cargo area front to back before you return, then hand every return to management.

WHERE THESE CODES COME FROM

These are FedEx's published delivery exception codes (FedEx code dictionary on fedex.com). Your scanner may show extra pickup or terminal codes, or slightly different wording. **Always choose the description on your scanner that matches what happened**, and check with your terminal's code card.

CODE	FEDEX DESCRIPTION	WHEN IT FITS	WHAT YOU MUST DO
01	**Missed delivery**	The package was on the truck but not attempted — buried on a shelf, out of time, or a stop skipped.	**Prevent it.** Sort by SID. If you can't make a stop, call dispatch before you skip it.

CODE	FEDEX DESCRIPTION	WHEN IT FITS	WHAT YOU MUST DO
03	**Incorrect address / unable to locate**	The address is wrong or incomplete (no such number, missing apt/suite) — after real effort to find it.	Re-check the label and map, ask a neighbor if safe, then **call dispatch from the stop** before you code it.
05	**Customer security delay**	A gate, guard, lobby or locked building keeps you from reaching the door.	Try the call box, the office or the customer's number on the label. **Call dispatch before coding.**
02	**Delivered — release authorized**	Delivered without a signature where the shipment allows it, or on a signed release.	Sheltered spot, sharp POD photo, correct location noted.
04	**Delivered to another address**	Left with a neighbor or another address — only when the signature option and customer instructions allow it.	Record exactly who or where. Never for DSR or ASR packages.
09	**Damaged — delivery completed**	The customer accepts a package that is visibly damaged.	Photograph the damage and note it on the scanner.
11 / 16	**C.O.D. delivery / payment received**	C.O.D. shipment delivered and payment collected.	Collect only the payment type shown. Turn in payment the same day.
07	**Refused by recipient**	The recipient refuses the package at the door.	Note the reason. Hand it to management at the end of the day.
08	**Business closed or adult unavailable**	A business is closed, or nobody eligible is there to sign (ISR, DSR, ASR).	Leave a door tag and scan it. Note the business hours.
10	**Damaged — not delivered**	The package is too damaged to deliver, or the customer refuses it because of damage.	Hand it to QA / management on return. Catch it at the dock if you can.

CODE	FEDEX DESCRIPTION	WHEN IT FITS	WHAT YOU MUST DO
14	**Undeliverable**	The package can't be delivered for another reason (vacant address, deceased, and so on).	Document the reason, then call dispatch.
17	**Customer requested future delivery**	A verified customer request to deliver on a later date.	Confirm the date. Hand it to the hold area.
15	**Business closed due to strike**	The business is closed because of a strike or labor action.	Rare. Note it and tell dispatch.
24	**Customer delayed delivery**	The customer caused the delay.	Note what happened. Tell dispatch.
20	**Restricted article / commodity unacceptable**	Hazmat or a restricted item that is missing paperwork, damaged or leaking, or not allowed.	**Do not load or deliver it.** Call management (Chapter 14).
13	**Other**	Nothing else fits.	**Always** type a clear note. Expect management to ask.

Source: FedEx Codes Dictionary — delivery exception codes (fedex.com). Codes 18 and 21–23 are air or network codes that drivers don't use.

11

CHAPTER 11 · STEP 7 OF 7

End of day — clean truck, clean handoff

Your truck is your office. Leave it the way you would want to find it.

ZERO TOLERANCE · URINE BOTTLES & HUMAN WASTE

Leaving urine bottles or any human waste in a cab or cargo area is a health hazard and disrespectful to the next driver and the mechanics. **It results in immediate disciplinary action, up to and including termination.** Need a bathroom stop? Take it — and tell dispatch if your route makes that hard.

Clean out

- Remove wrappers, cups, bottles, shrink wrap, cardboard and trash from the dash, floor and shelves.
- Leave the truck ready for the next shift.

Hand off returns

- Every undelivered package has a valid code.
- Hand returns **to a manager** with an explanation — never drop them in a bin unattended.

Post-trip report

- Federal law requires a written report when you find or are told about a defect. 396.11
- **Company policy: a post-trip check every day.** Report lights, brakes, tires or damage so repairs happen overnight.
- Dock the scanner, charge batteries and put keys in the lockbox.

PART III

Rules of the road

The federal rules that apply to every commercial vehicle we run — in plain English.

12

CHAPTER 12 · 49 CFR PART 395

Hours of service

Fatigue kills. Federal limits apply to every commercial truck we run (10,001 lb or more).

RULE	THE LIMIT	WHAT IT MEANS FOR YOU
11-hour driving	Max 11 hours behind the wheel	Only after 10 consecutive hours off duty.
14-hour window	No driving after the 14th hour on duty	Dock sorting, pre-trip, breaks and post-trip all count. Then 10 hours off.
30-minute break	After 8 hours of driving	Any 30 minutes in a row off the wheel. Not required if you qualify for short-haul (below).
60 / 70 hours	60 hrs in 7 days or 70 hrs in 8	Reset with 34 hours off in a row.
Short-haul exception 395.1(e)(1)	Stay within **150 air-miles** of the terminal and be **released within 14 hours**	No logbook or ELD needed — the company keeps your start and end times instead. Go past 150 miles or 14 hours and full logging rules apply **that day**.
Non-CDL short-haul 395.1(e)(2)	Within 150 air-miles, return to the terminal	Drivers of non-CDL trucks may stretch to 16 hours on duty on 2 days in any 7 — **only with management approval.**

HEADING TOWARD 14 HOURS?

Call dispatch early — not at hour 13. We would rather send a rescue than have you break the law or drive tired.

13

CHAPTER 13

Phones, seat belts, alcohol & drugs

The fastest ways to lose your job — and your license.

Phones & screens 392.80 · 392.82

- **No texting** while driving — that includes reading texts, emails and apps.
- **No handheld calls.** Do not hold the phone, and do not dial by pressing more than one button.
- Hands-free is allowed only if the phone is mounted within reach while you are belted in.
- "Driving" includes sitting at a red light or in traffic. Pull over and park first.
- Only exception: calling 911 or police in an emergency.
- These violations carry heavy fines, and repeat offenses can disqualify you from driving commercial vehicles.

Alcohol & drugs

- **Company policy: zero.** No alcohol, marijuana or illegal drugs on duty, on station property or in a truck.
- No alcohol within **4 hours** before duty.
- DOT standards: an alcohol level of **0.04** or higher is a violation, and **0.02–0.039** means at least 24 hours off duty. 382.201 · 382.505
- State marijuana or medical cards **do not count** — federal transportation rules still apply.
- Prescriptions that cause drowsiness: tell management before you drive.
- Refusing a required test is treated the same as a positive test.

TESTING

Every driver is tested before hiring and when management has reasonable suspicion or after a crash. Drivers who hold a CDL are also in the federal random-testing program (49 CFR Part 382). Go to the clinic **right away** when directed.

14

CHAPTER 14 · 49 CFR PARTS 171–177

Hazardous materials & dry ice

Most hazmat you will see is small, legal and safe — if it is packed, papered and loaded right.

Before you accept or load

- Check for **hazard labels and markings**: the UN number, proper shipping name, class and packing group.
- Check the **FedEx Ground hazmat shipping paper (OP-900)** and the shipper's signed certification. They must match the package.
- Leaking, damaged, unsigned or mislabeled? **Do not load it.** Use the restricted-article code (20) and call management.
- **Limited Quantity** packages show the black-and-white diamond mark and may weigh up to 30 kg (66 lb) gross. The old "ORM-D" marking is no longer valid for ground shipments.

In the truck

- Keep shipping papers **within reach while belted**, or in the driver-door pouch when you are out of the cab. 177.817
- Load hazmat near the rear door, upright (arrows up), blocked and braced. Never stack heavy freight on top.
- Keep incompatible classes apart, such as corrosives (class 8) away from oxidizers (class 5).
- **Placard limit:** 1,001 lb or more combined of placard-table hazmat requires placards and a hazmat-endorsed CDL. **P&D trucks must stay below that limit.** 172.504

Dry ice (UN1845, class 9)

- Dry ice turns into CO_2 gas that pushes oxygen out of closed spaces.
- The package must show the net weight in **kg**.
- Load it in the cargo area **only, never in the cab**. Keep the bulkhead door closed and let air in before you climb in after a long stretch.

Never on a P&D truck

- Explosives (1.1–1.3), poison gas (2.3), dangerous-when-wet (4.3), poison-inhalation hazards, infectious substances (6.2) and radioactive material (class 7).
- Damaged or recalled lithium batteries, or any battery shipment that isn't marked correctly.
- In doubt? **Stop and call.**

15

CHAPTER 15

Heat, dogs & personal safety

Your life is worth more than any package.

Beat the heat — water, rest, shade

- Drink water often, **before you feel thirsty** — about a cup every 15–20 minutes in hot weather. Go easy on energy drinks.
- Cool down in the A/C or shade on breaks. A cargo area in summer gets far hotter than the street.
- New or returning from time off? Your body needs about **1–2 weeks** to adjust. Pace yourself and take more breaks.
- Wear light, breathable uniform layers and a FedEx cap.

Know the signs

- **Heat exhaustion:** headache, dizziness, weakness, heavy sweating, nausea, cramps. → Stop, cool down, drink water and call dispatch.
- **Heat stroke (an emergency):** confusion, slurred speech, fainting, seizures, very hot skin — sweating may stop. → **Call 911**, get to shade, cool with water and fanning.
- Sweating does not mean you're safe. Watch your coworkers too.

Dogs

- Look for bowls, toys, chains and "Beware of Dog" signs. Rattle the gate or honk before you enter.
- A dog comes at you: **do not run.** Stand still, keep the package between you and the dog, avoid eye contact and back away slowly.
- If you are bitten: get to safety, clean the wound, **report it immediately** and get medical care.

Robbery & threats

- **Never fight over a truck, scanner or freight.** Comply calmly and remember details safely.
- Get to safety, then call 911 and management.
- If something feels wrong at a stop, leave and call. We will back your decision.
- Ice, flooding or storms: slow down, and call if the roads aren't safe.

16

CHAPTER 16

Accidents, breakdowns & emergencies

Stay calm. Follow the steps. Call us.

1. **Stop and secure the scene**
   Never leave the scene. Flashers on immediately, parking brake set, engine off if there's any leak or smoke.

2. **Check for injuries and call 911**
   Help only as far as it's safe. Do not move injured people unless they're in danger.

3. **Set out triangles within 10 minutes**
   Two-way road: 10 ft from the truck on the traffic side, 100 ft behind and 100 ft ahead. Divided or one-way road: 10, 100 and 200 ft behind. Near a hill or curve: put one 100–500 ft back so drivers see it in time. **392.22**

4. **Call management right away**
   Your manager or dispatcher — the number on your quick-reference card — before you talk to anyone else about fault.

5. **Document, don't debate**
   Photograph every vehicle, plate, the damage, the road and the signs. Exchange license, insurance and registration. Be polite and don't admit fault — the camera and the facts will tell the story.

6. **Testing & reporting**
   If directed to test, go immediately. Under federal rules, alcohol tests happen within 2 hours, drug tests within 32 hours, and you may not drink alcohol for 8 hours after the crash. Stay reachable. **382.303**

Leaking or smoking package

- Stop in a safe, open area away from people.
- Don't touch it or breathe the fumes. Take the shipping papers and move upwind.
- Call 911, then your manager, then FedEx (1-800-463-3339).

Breakdown

- Get fully off the road if you can. Flashers on, triangles out.
- Call dispatch — the spare truck and a rescue driver are on the way.
- Stay with the truck and freight unless you're unsafe.

PART IV

Tools

Your daily checklist, a quick-reference card for the cab, and your signed acknowledgment.

17

CHAPTER 17

Daily readiness checklist

Twelve checks. Every route. Every day.

- [ ] Reviewed the last inspection report, then walked around: tires (4/32" steer, 2/32" others), brakes, steering, lights, fluids, full tank.
- [ ] Fire extinguisher charged and secured, 3 triangles, first-aid kit and truck papers on board.
- [ ] In full uniform, badge visible, safety shoes on, medical card in my wallet.
- [ ] Scanner charged; GroundCloud on with location tracking; manifest checked for out-of-area stops.
- [ ] Shelves sorted by SID with labels facing the aisle — no missed deliveries today.
- [ ] Misloads, bad addresses and damaged boxes handed back at the dock.
- [ ] Seat belt every move, phone mounted, no speeding, full stops, backing only with G.O.A.L.
- [ ] Read every label twice, carried packages to upper-floor doors, took sharp POD photos.
- [ ] Hit every pickup window and scanned 100% of packages as loaded.
- [ ] Called dispatch before any bad-address (03) or security-delay (05) code.
- [ ] Walked the cargo area — zero uncoded packages; returns handed to a manager.
- [ ] Truck cleaned out (zero bottles or waste), post-trip done, keys in the lockbox.

18

CHAPTER 18

Quick reference card

Keep it in the cab.

WHO / WHAT	NUMBER	WHEN
Emergency	**911**	Injury, fire, crash, threat, leaking hazmat
Dispatch _____	_____	Bad address, delays, breakdowns
Manager _____	_____	Crashes, anything serious
Terminal _____	_____	Where you report each day
FedEx	1-800-463-3339	Hazmat incidents, after 911

Hours

- 11 hrs driving / 14-hr window
- 10 hrs off between shifts
- Short-haul: 150 air-miles, released within 14 hrs

Truck

- Tread 4/32" steer, 2/32" others
- 5 B:C extinguisher plus 3 triangles
- Triangles out within 10 min

Never

- Handheld phone or texting while driving
- Bad-address code without calling
- Uncoded returns or bottles left in a truck

19

CHAPTER 19

Driver acknowledgment

Sign, date and hand this page to management.

I have received and read the **Driver Handbook (2026 Edition)** issued by my employer. I understand and agree to follow it, including: the daily pre-trip inspection and GroundCloud tracking; dock organization to prevent missed deliveries; safe driving with no speeding, no handheld phone use and a seat belt at all times; reading every label twice and carrying packages to upper-floor doors; on-time pickups and 100% scanning; **calling management before using a bad-address code**; **zero uncoded packages**; the uniform and appearance standards; the alcohol and drug policy; and the **zero-tolerance policy on urine bottles and human waste**.

I understand this handbook does not replace federal or state law or FedEx Ground standards, and that my employer may update it at any time.
